

The latest revised Egypt Advance Cargo Information (ACI)

15th October 2021

Dear Valued ONE Customers,

Following the announcement made regarding Egyptian Customs law #207/202, Advance Cargo Information (ACI) on 1st June, ONE wish to make the announcement with the latest revised information.

After the shipping line conferences with The Egyptian Customs on 11th October, it has been confirmed that the Exporter Registration Number and The Egyptian VAT number should belong to the actual shipper and actual consignee who are registered in the Nafeza portal for an ACID number.

Exporter Registration Number:

- This number belongs to the actual shipper (registered Foreign Exporter in the Nafeza portal)

The Egyptian VAT Number:

- This number belongs to the actual consignee in Egypt (registered Egyptian Importer in the Nafeza portal)

For the Freight Forwarder customer, the Shipper or/and the Consignee on the Master BL are not necessarily the same as the Actual shipper/consignee.

- Example: Actual Customer (Exporter) = ABC Shipper on the BL = Freight Forwarder
A

Actual Customer (Importer) = XYZ Consignee on the BL = Freight

Forwarder B

It is also possible to register yourself (Freight Forwarder) as the Actual shipper or/and Actual Egyptian consignee in the Nafeza Portal.

In case of the consolidated cargo to the destination Egypt, it is advised by the Egyptian customs for the shipping line to receive the ACID Number, Exporter Registration Number / The Egyptian VAT number of the Freight forwarder who is placing the booking to the Shipping line.

Please ensure to register yourself in the Nafeza portal to request the ACID Number in prior to place the booking to ONE booking office.

Should you have any inquiry, please contact your local ONE Agent.

Thank you very much for your understanding.
