ONE Brazil's Heartbike rides into the hearts of 40 children beneficiaries

A bicycle can be a lifeline for underprivileged children. For the children of NGO "Projeto Ondas," a bicycle can mean the difference between being able to attend school and being forced to stay home – opening new opportunities for these children to participate in socio-educational projects that would otherwise be out of reach.

With a hope to improve access to education for our beneficiaries, nearly 200 employees from ONE's Brazil offices assembled bikes under the supervision of technicians, in a team-building and motivational exercise. Besides having a positive impact on the lives of 40 children who received the bikes as gifts, this meaningful experience also fostered collaboration and a sense of shared purpose amongst the employees.

This Heartbike Project was facilitated by NGO "Projeto Ondas" together with Dinâmica Recreação e Lazer Ltda.
